PRIME MINISTER'S 10 POINT AGENDA FOR DISASTER RISK REDUCTION

BUILDING A DISASTER RESILIENT INDIA

1

MAINSTREAM DRR IN DEVELOPMENT

Integrate disaster risk reduction into development sectors (housing, roads, etc.)

2

RISK COVERAGE FOR ALL

Provide insurance and safety nets for poor households and small businesses

3

WOMEN'S LEADERSHIP IN DRR

Encourage greater involvement and decision-making roles for women

4

INVEST IN RISK MAPPING

map and understand all hazards across India (earthquakes, floods, etc.)

5

LEVERAGE TECHNOLOGY

Use advanced technology and data for efficient disaster management

6

GLOBAL UNIVERSITY NETWORK

Establish a network of universities to work on disaster risk issues

7

USE SOCIAL MEDIA & MOBILE

Utilize platforms for early warning systems and education

8

STRENGTHEN LOCAL CAPABILITY

Build local capacity and initiatives for a quicker response

9

LEARN FROM PAST DISASTERS

Studies and analysis of previous disasters to improve future preparedness

10

FOSTER GLOBAL COOPERATION

Build cohesion and teamwork in international disaster responses

Gujarat Institute of Disaster Management

The Gujarat Institute of Disaster Management (GIDM) is registered as an autonomous society under the Government of Gujarat. The Institute has been entrusted with the responsibility of human resource development, capacity building, training, research and documentation in the field of Disaster Risk Management. As per the GIDM's objectives, it focuses on enriching the capacities – in specific areas of prevention, mitigation, preparedness, relief, recovery, rehabilitation, reconstruction and sustainable development – of the officials and other functionaries of the state and district administration for response to emergencies and in the longer run, it will take up similar capacity building for other stakeholders in the country.

Vision & Mission of GIDM

To establish GIDM as a state-of-the-art premier institute for training, education and research related to disaster management. GIDM will focus on enriching the capacities – in specific areas of prevention, mitigation, preparedness, relief, recovery, rehabilitation, reconstruction and sustainable development – of officials and other functionaries of the State and district administration, autonomous institutions and non-governmental organizations.

Make available to all stakeholders the knowledge and skills required to develop their individual competencies, gain appropriate understanding and accomplish appropriate disaster management tasks, while establishing and strengthening overall disaster management institutional capacities at the national, state and local levels.

Sendai Framework for Disaster Risk Reduction 2015-2030

Scope and purpose

The present framework will apply to the risk of small-scale and large-scale, frequent and infrequent, sudden and slow-onset disasters, caused by natural or manmade hazards as well as related environmental, technological and biological hazards and risks. It aims to guide the multi-hazard management of disaster risk in development at all levels as well as within and across all sectors.

Goal

Prevent new and reduce existing disaster risk through the implementation of integrated and inclusive economic, structural, legal, social, health, cultural, educational, environmental, technological, political and institutional measures that prevent and reduce hazard exposure and vulnerability to disaster, increase preparedness for response and recovery, and thus strengthen resilience.

Expected outcome

The substantial reduction of disaster risk and losses in lives, livelihoods and health and in the economic, physical, social, cultural and environmental assets of persons, businesses, communities and countries.

Targets

Substantially reduce global disaster mortality by 2030, aiming to lower average per 100,000 global mortality between 2020-2030 compared to 2005-2015

Substantially reduce the number of affected people globally by 2030, aiming to lower the average global figure per 100,000 between 2020-2030 compared to 2005-2015

Reduce direct disaster economic loss in relation to global gross domestic product (GDP) by 2030

Substantially reduce disaster damage to critical infrastructure and disruption of basic services, among them health and educational facilities, including through developing their resilience by 2030

Substantially increase the number of countries with national and local disaster risk reduction strategies by 2020

Substantially enhance international cooperation to developing countries through adequate and sustainable support to complement their national actions for implementation of this framework by 2030

Substantially increase the availability of and access to multi-hazard early warning systems and disaster risk information and assessments to people by 2030

Priorities for Action

There is a need for focused action within and across sectors by States at local, national, regional and global levels in the following four priority areas

Priority 1

Understanding disaster risk

Priority 2

Strengthening disaster risk governance to manage disaster risk

Priority 3

Investing in disaster risk reduction for resilience

Priority 4

Enhancing disaster preparedness for effective response, and to «Build Back Better» in recovery, rehabilitation and reconstruction
