On

Building Coastal Resilience in Gujarat: Strategies for a Sustainable Future

Date: 21st December 2023

Time: 14:30hrs – 16:30hrs

A. BACKGROUND

Gujarat is its extensive coastline along the Arabian Sea. While this coastline contributes to the state's beauty and economic potential, it also exposes it to a range of natural hazards, including cyclones, sea-level rise, and coastal erosion. The coastal areas of Gujarat face distinctive challenges that arise from their vulnerability towards various natural hazards. Cyclones can bring destructive winds and heavy rainfall, sea-level rise can lead to inundation of low-lying areas, and coastal erosion can threaten valuable land and infrastructure. These challenges are further compounded by the impacts of climate change, which can intensify the frequency and severity of extreme weather events. As a result, the communities residing in these coastal regions are particularly susceptible to the adverse effects of these hazards.

To address these challenges, it is crucial to develop and implement effective strategies that can enhance the resilience of Gujarat's coastal areas. Resilience in this context refers to the capacity of these regions to withstand, adapt to, and recover from the impacts of natural disasters and other stressors. Building resilience is not only about mitigating the immediate impacts of disasters but also about creating sustainable, long-term solutions.

By enhancing resilience, Gujarat can improve its ability to endure and bounce back from natural disasters. This means not only protecting lives and property but also preserving the unique and valuable ecosystems that thrive along the coast. Furthermore, a focus on resilience ensures that the well-being and sustainable development of the communities living in these coastal areas are safeguarded. It involves comprehensive planning, infrastructure development, early warning systems, and community engagement to reduce vulnerabilities and enhance the adaptive capacity of these regions.

The virtual training program titled 'Building Coastal Resilience in Gujarat: Strategies for a Sustainable Future' is designed to equip participants with a deep understanding of the concept of resilience and its practical relevance to the specific challenges faced by coastal regions. The program aims to provide knowledge and tools that can empower individuals and organizations to contribute to the development of strategies and actions that will make

Gujarat's coastal areas more resilient, better prepared, and more capable of thriving in the face of future challenges.

B. NEED FOR THIS TRAINING PROGRAMME

The training programme on "Building Coastal Resilience in Gujarat: Strategies for a Sustainable Future" is essential due to the region's vulnerability to natural hazards, such as cyclones, sea-level rise, and coastal erosion, which pose significant risks to both lives and property. The exacerbation of these hazards by climate change heightens the urgency for proactive measures. Moreover, the coastal ecosystems in Gujarat hold ecological and economic significance, necessitating their protection for the sake of biodiversity, fisheries, and the livelihoods of coastal communities.

The programme is crucial for ensuring the long-term well-being and sustainable development of these communities, requiring the development of resilience strategies encompassing infrastructure, community engagement, early warning systems, and environmental conservation. Capacity building, public involvement, and policy implementation are integral aspects addressed in the program, all aimed at preparing Gujarat's coastal areas to withstand environmental challenges and to prosper in an era of increasing climate risks.

C. OBJECTIVES

1. Increase awareness towards the concept of resilience and its relevance in the coastal areas of Gujarat.
2. Equip participants with the skills to assess coastal vulnerability and risks and develop tailored resilience strategies.
3. Foster collaboration among stakeholders for effective coastal resilience planning and implementation.
4. Promote the integration of nature-based solutions in coastal resilience strategies for sustainable development.

D. TARGET AUDIENCE

The training programme on 'Building Coastal Resilience in Gujarat: Strategies for a Sustainable Future' has targeted the participants from various departments of the Gujarat

state government. Here are some key departments and agencies that could benefit from the programme:

Sr. No.	Target Departments	Category of Participants
1.	Agriculture & Co-Operation Department	L2, L3
2.	Gujarat Maritime Board	
3.	Water Resources Department	
4.	Commissioner of Fisheries	
5.	Revenue Department	
6.	Panchayat, Rural Housing & Rural Development Department	
7.	Roads and Buildings Department	
8.	Forest & Environment Department
