

### Inception Workshop

The project 'Capacity Building Programme on Climate Smart Governance' aims to create a Climate Smart Governance (CSG) initiative, focusing on sectors most vulnerable to climate fluctuations. By harnessing the latest research and stakeholder insights, we will identify and prioritize key sectors to develop and implement tailored CSG strategies. This project will foster a proactive, collaborative approach to addressing climate-related challenges, policy and research gaps analysis ensuring a more resilient and sustainable future for our communities

**Date:** 30-January-2025

**Venue:** Seminar Hall, Ground Floor, GIDM

**Purpose:** Undertake a Training Need Analysis (TNA) to diagnose capacity gaps across institutional, organizational, and individual levels, and attempt to develop strategies to address the gaps in research and implementation, ultimately strengthening climate smart governance
